PROFESSIONAL PROFILE

Software Engineer with a strong full-stack technical background and a focus on Solution Engineering and Technical Pre-Sales. Able to connect the dots between technical development teams and non-technical business stakeholders, leading cross-departmental requirement discovery, conducting Proof-of-Concept (PoC) walkthroughs, and translating complex system architectures into actionable business solutions. Hands-on expertise in developing responsive web applications, crafting modular frontend components, and integrating resilient backend RESTful APIs and database schemas.

CORE COMPETENCIES & TECHNICAL SKILLS

- Web Stack & Languages:** Python, React, TypeScript, Tailwind CSS, JavaScript, PHP, SQL, Laravel, Flutter, HTML5/CSS3
- Databases & Data Systems:** MySQL, Relational Database Design, SQL Querying, Data Modeling, SQL Workbench.
- Solutions & API Integration:** RESTful APIs, JSON Payloads, Webhooks, Postman, HTTP Protocols, System Specification Mapping, Requirements Gathering, Technical Discovery, Pre-Production Demos.
- Tools & Methodologies:** Git, GitHub, Jira, VS Code, SDLC Documentation.
- Spoken Languages:** English (Fluent), Arabic (Fluent).

WORK EXPERIENCE

Awesomeree Sdn. Bhd.
Frontend Web Developer Intern

Kuala Lumpur, Malaysia
Feb 2026 – Aug 2026

- Production Web Application Development:** Engineered and shipped 8 production web applications, building 4 from scratch and redesigning 4 legacy platforms, using React, TypeScript, Tailwind CSS, Three.js (React Three Fiber), and Framer Motion to deliver responsive, interactive 3D web interfaces across desktop and mobile.
- Pre-Production Demos & PoC Walkthroughs:** Built Proof-of-Concept (PoC) web components and conducted live system demonstrations for non-technical stakeholders prior to production deployment, ensuring complete business alignment.
- Cross-Departmental & Technical Communication:** Ran discovery sessions with Marketing and Customer Support, translating operational workflows and business needs into actionable UI/UX specifications and feature releases.
- API & Middleware Integration:** Co-engineered state-managed middleware linking conversational platforms with automated LLM orchestration, enforcing API payload validation, token constraints, and context-aware escalation rules.
- Design System Standardization:** Architected a centralized, reusable core UI library (components/shared-ui/) using React and Tailwind CSS, eliminating interface drift across legacy web applications.
- Database & Deployment Management:** Monitored execution health during 37k+ row database syncs using SQL Workbench, resolving data race conditions and managing staging-to-production deployment pipelines via Git and Jira.

PROJECT EXPERIENCE

Multi-Store Management System for Sahel Retail LTD – Final Year Project (Grade: A+)

Mar 2025 – Feb 2026

- Full-Stack Architecture & UI/UX:** Designed and deployed a cross-platform mobile and web ecosystem using Flutter (Dart) and Laravel (PHP) to eliminate inefficient manual retail operations and standardize user interfaces.
- API Engineering & Database Design:** Built a robust RESTful API layer with MySQL, implementing role-based access control (RBAC) for 3 actors (Admin, Seller and Customer), real-time inventory sync, and automated order processing gates.
- SDLC Documentation & Defense:** Authored a comprehensive 6-chapter technical specification report detailing Methodology, Requirements Engineering, System Analysis and Design, Testing and Implementation. Successfully defended the architecture before an academic evaluation panel.

EDUCATION

University Tun Hussein Onn Malaysia (UTHM)
Bachelor of Computer Science (Software Engineering) with Honours
Cumulative Point Average (CPA): **3.49/4.0** | Grade Point Average (GPA): **3.99/4.0**
Relevant Coursework: Software Engineering Principles, Requirements Engineering, System Analysis and Design, Object Oriented Programming, Database, Web Development, Software Design, Software Testing, Algorithms & Complexity.

Mar 2023 – Dec 2026

CERTIFICATES & AWARDS

- Dean's List Award:** Two-time consecutive recipient for academic excellence (Sem 2 2024/2025: 3.67 GPA) and (Sem 1 2025/2026: 3.99 GPA) | Universiti Tun Hussein Onn Malaysia.
- AI & Data Engineering Certifications:** Machine Learning Using SAS Viya • Power BI Data Modelling Basics.
- Infrastructure & Networking Certifications:** CCNAv7: Introduction to Networks.
